## AUTUMN FIRE SAFETY: PREVENTING OUTDOOR FIRES

Never park your car or truck over a pile of leaves. The heat from the vehicle's catalytic converter or exhaust system can ignite the leaves below. The resulting fire could destroy your vehicle. Flammable liquids should not be stored inside the home or in an attached garage or shed. This includes any unused fuel still in the fuel tank. Store this equipment away from your home or drain excess fuel out of the tank before storing. This simple safety precaution will help prevent accidental fires from escaping fuel vapors. Remove fuel from lawn mowers before storing them for winter. Contact your utility company if trees or branches are not clear of power lines. Prune back trees, and rake up leaves and debris. Don't store cardboard boxes, paper or other flammable materials in the backyard. These materials provide ready fuel for a fire and all it takes is one spark.

We appreciate your excitement for the new pavilion however in the interest of safety we ask that you please avoid the area for the time being.
